

MUSKAN GUPTA

Product & Strategy

Bangalore | 8839062051 | muskangupta.2328@gmail.com | [LinkedIn](#) | [Portfolio](#)

SKILLS

Product Management: Product Discovery, User Research, PRD Writing, Roadmap Prioritization (RICE/MoSCoW), User Journey Mapping

Data & Analytics: Product KPIs & Metrics, SQL, Power BI, Advanced Excel (Financial Modeling), Variance Analysis

Business & Strategy: Stakeholder Management, Market & Competitive Analysis, GTM Strategy, Cross-Functional Collaboration

Tools: Agile/Scrum, Google Sheets, Notion

AI Tools: ChatGPT, Claude, Perplexity

PROJECTS

UPI Payment Apps — Privacy-Preserving Recall Request — [Case Study](#) [Prototype](#)

Product Strategy & Privacy-First Design Case Study

- Solved a real gap: if someone sends money to the wrong UPI ID, they have **no way to get it back** — apps hide phone numbers for privacy, and banks treat it as a valid payment, not fraud.
- Designed a simple in-app "**recall**" flow with **built-in safeguards against misuse**: sender flags the payment; receiver gets a one-line request and can approve a refund in one tap — **no phone information numbers or personal details are ever shared**.
- Measured success by how many disputes got resolved with **zero personal exchanged**, starting with a small pilot before rolling out wider.

CRED — Auto-Split Engine (Social Sync) - [Case Study](#) [Prototype](#)

Product Strategy & Fintech Case Study

- Designed an **event-driven auto-settlement workflow** that auto-splits large card transactions and collects payments from a user's group via **contextual UPI nudges** timed to credit due cycles.
- Defined success metrics** — **repayment completion rate, repeat settlement frequency, reminder interaction rate** — to benchmark settlement velocity and product stickiness.

Splitwise — Smart-Sync Settlement - [Case Study](#) [Prototype](#)

Product Strategy & User Experience Case Study

- Designed an **event-triggered Smart-Sync workflow** integrating **UPI deep-links** to auto-reconcile settlements, closing the gap between external payments and in-app debt tracking.
- Proposed **real-time settlement prompts** to lift confirmation rates and cut manual debt-update friction.

EXPERIENCE

Give — Associate, Financial Analyst

June 2025 – March 2026

Bangalore

- Performed **financial data validation** and **data reconciliation** across reporting datasets to ensure **reporting accuracy**, completeness, and data integrity.
- Analyzed **reporting discrepancies** and led **root cause analysis** of data inconsistencies, partnering **with cross-functional stakeholders** to resolve exceptions.
- Supported **month-end reporting** activities and maintained **financial controls** to ensure reliable and accurate reporting processes.
- Conducted **variance analysis** and **trend analysis to identify** unusual patterns, reporting gaps, and business exceptions, supporting data driven decision making.
- Consolidated financial information across teams **for management reporting, business reviews, and performance analysis**.
- Developed **automated reporting solutions** in **Advanced Excel** and built **Power BI dashboards**, improving reporting efficiency and data visibility for stakeholders.
- Gathered and validated reporting requirements with business stakeholders to continuously enhance reporting processes and financial controls.
- Maintained accurate financial records **through data review, data validation, reconciliation, and continuous process improvement initiatives**.
